Career Objective: Game Programmer / Unity Developer

Education

Tsinghua University **09/2023 – Present**
M.S. & Ph.D. in Computer Science Beijing, China

Courses: Combinatorics and Algorithm Design, Software Project Management, Machine Learning, Human-Computer Interaction, Natural Language Processing.

HSE University **09/2019 – 06/2023**
B.S. in Software Engineering Moscow, Russia

Courses: Algorithms and Data Structures, Databases, Calculus, Software Testing, Mathematical Statistics, Programming, Software System Architecture, UE 4 Game Development, Application Development.

Project Experience

Neon Protocol **Unity** **01/2026 – Present**

Project: A cyberpunk 2D otome game with branching story routes, puzzles, relationship-building, and interactive game systems for mobile platforms.

Tasks:
- Designed a scalable UI architecture using Unity ScriptableObjects to manage and dynamically load chapter and game data.
- Developed persistent player-data systems using custom JSON storage, including progress, currency, and unlocked content; integrated Firebase Authentication for user registration and login.
- Implemented gameplay, puzzle mechanics, interactive UI, and narrative progression systems.
- Created and integrated 2D game assets, backgrounds, particle effects, and scene-dependent music.

Beyond the Code **Unity** **10/2024 – 10/2024**

Project: A platformer game about a ghost exploring cyberspace. Players activate ports, navigate a digital environment, avoid dangerous creatures, unlock new abilities, solve puzzles, and uncover the deeper secrets of the digital world. Developed as part of the 2024 Nanjing University Computer Science × NetEase Games Leihuo Game Development Competition.

Awards: Best Potential Award + Offline Popularity Award

Tasks: Implemented character movement mechanics, including jumping and environmental interactions.

LIA **Unity** **11/2022 – 04/2023**

Project: A 2D escape/adventure game where the player explores environments, collects objects, interacts with characters, and completes missions.

Tasks:
- Implemented player movement and interaction systems for exploring the world.
- Developed an inventory system for collecting, storing, and using items during gameplay.
- Implemented item interactions, character dialogue, and mission/quest progression.
- Designed gameplay logic connecting exploration, collected objects, NPC interactions, and puzzle progression.

Skills

Programming:
C++ (★★★★☆), C# (★★★★☆), Java (★★★★☆), JavaScript/React (★★★★☆), SQL (★★★☆☆)
Unity (★★★★★), Web Development (★★★★☆), VS, IntelliJ IDEA, Git, GitHub

Game Development: Unity, ScriptableObjects, Prefabs, Animator, Particle System, Sprite Editor, TextMeshPro, Unity Physics, Package Manager, Branching Gameplay, Game UI, 2D Assets

Creative Tools: Figma, Photoshop, CapCut

Languages: Russian (native), English (fluent), Chinese (HSK4, intermediate)
